

KRUNAL SEDANI

Senior Database Performance & Platform Engineer | Oracle · PostgreSQL · DevOps · Cloud
+91 96 65 632152 • krunalsedani@gmail.com • linkedin.com/in/krunalsedani • Pune, India

PROFESSIONAL SUMMARY

Senior Database Performance Engineer with 12+ years of expertise in Oracle and PostgreSQL for high-throughput payment systems. At ACI Worldwide, embedded within the core Product and NFR (Non-Functional Requirements) team to drive database scalability of UPF (Universal Payment Framework) — an immediate-payment platform trusted by Bank Indonesia, Paynet (Malaysia), Westpac, Rabobank, Bank of Montreal, SBC Bank Philippines, CIMB Singapore, and NedBank South Africa, and National Australia Bank (NAB). Proven track record of benchmarking systems at 1,800+ TPS, designing PostgreSQL BDR replication clusters, automating full-stack deployments, and travelling on-site to APAC customers to diagnose and resolve performance bottlenecks at scale. Comfortable working at the intersection of database engineering, product performance, and DevOps automation — not break/fix, but building the foundations that make products scale.

TECHNICAL SKILLS

Databases	Oracle RDBMS 10g–19c, PostgreSQL (BDR 5 / PG 15, Crunchy Data), RAC, ASM, Multitenant (CDB/PDB), Sybase ASE
Replication	Oracle GoldenGate 11g–19c, OGG Microservices, GG Bigdata, PostgreSQL BDR (EDB), Kafka Handler
HA / DR	Oracle Data Guard (Physical/Snapshot Standby), RMAN/ZDLRA, Flashback, Failover & Switchover
Performance	Query/Execution Plan Tuning, OEM 12c/13c, AWR/ASH Analysis, Benchmarking, TPS Profiling
Automation & DevOps	Jenkins CI/CD, Docker, Shell Scripting, YAML, tpaexec (EDB), GIT/SVN, MCP-based tooling, DB Vault, TDE
Cloud & Agile	Azure (Administrator · Architect · DevOps), AWS, Kubernetes (CKA), SAFe 5 Practitioner, Agile
Certifications	Oracle GoldenGate 12c · SAFe® 5 Practitioner · Azure Administrator · Azure Solutions Architect · Azure DevOps · CKA (Kubernetes) · Oracle AI

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Database Performance & NFR | **ACI Worldwide, Pune** Jan 2022 – Present

Product: UPF (Universal Payment Framework) — real-time immediate payment platform | Oracle 19c · PostgreSQL BDR 5 (PG 15) · Crunchy Data on Azure

- ▶ Embedded in the core Product and NFR team — working closely with Principal Performance Engineers to scale UPF database performance at the product level, upstream of customer deployments.
- ▶ Benchmarked UPF (latest version, Oracle 19c) at 1,800 TPS with Liquidity; profiled bottlenecks and tuned execution paths to sustain throughput.
- ▶ Manage and validate PostgreSQL BDR 5 clusters on PG 15 for multiple global customers; design topology-specific cluster configurations using EDB's tpaexec tool.
- ▶ Built end-to-end automation for PG BDR cluster deployments across all UPF topologies using Docker, Jenkins, Shell scripts, and YAML pipelines — reducing manual setup from days to hours.
- ▶ Serve as primary DBA liaison with EDB: reproduce BDR bugs, drive issue resolution, and validate quarterly patch releases before customer rollout.
- ▶ Travelled to Bank Indonesia (Jakarta) and Paynet (Kuala Lumpur) as part of product + performance team to diagnose on-site scaling issues and implement fixes.
- ▶ Supporting National Australia Bank (NAB) on UPF with a 3-node Crunchy Data PostgreSQL cluster deployed on Azure — managing topology design, cluster health, and performance optimisation for the cloud-native setup.

- ▶ Won ACI India Hackathon (Oct 2025) — 1st place among 15+ teams — by building an MCP-based tool that connects to Oracle/PG NFR databases, enabling product and NFR teams to identify and resolve database performance issues interactively; tool is now live and in active use across ACI.

Oracle/PostgreSQL DBA & DevOps Consultant | Vodafone Intelligent Solutions (VOIS), Pune *Sep 2019 – Dec 2021*

Part of Vodafone Germany's post-acquisition data consolidation programme — integrating databases across 2–3 acquired companies into unified data pipelines for the German telecom operation.

- ▶ Designed and managed Oracle GoldenGate (OGG 19c) replication pipelines as the backbone of cross-database data consolidation — enabling seamless data flow across heterogeneous Oracle, PostgreSQL, and Sybase ASE environments.
- ▶ Led a team of 5 to architect and deliver OGG solutions; translated business requirements from German client stakeholders into replication and data transformation designs.
- ▶ Built real-time Oracle-to-Kafka data streaming pipelines using OGG Kafka Handler — enabling downstream analytics and event-driven systems to consume consolidated telecom data.
- ▶ Automated OGG deployment, monitoring, and alerting using Jenkins CI/CD, GIT, and Unix shell scripting; reduced manual intervention across the pipeline.
- ▶ Awarded 'Pat on Back' for delivering the Sybase OGG project under tight consolidation timelines (Dec 2020).

Senior Oracle Database Administrator | HSBC Bank, Pune *Dec 2015 – Sep 2019*

- ▶ Resolved critical performance issues across HSBC Internet Banking, AML, KYC, Screening, and OTP systems — tuning execution plans, managing Data Guard switchovers, RAC and RMAN operations.
- ▶ Configured Oracle GoldenGate for cross-region replication; managed database infrastructure resilience and capacity.
- ▶ Acknowledged three times with 'Best Team Player' award for cross-team collaboration during major database incidents.

Oracle Database Administrator | Citi Bank Project – Wipro Technology, Mumbai *Nov 2013 – Dec 2015*

- ▶ Administered Oracle RDBMS 11g databases for Citi Bank's Payment and Finance backbone; handled BAU tasks including backup, capacity planning, and performance triage.
- ▶ Ranked 2nd among 80 freshers in Wipro's training programme (Nov 2013); awarded 'Smart Learner' by the project.

EDUCATION

B.Tech – Computer Engineering | Govt. College of Engineering, Amravati (MH) *2009 – 2013*

CGPA 7.43 | Maths 8.2 | Ranked 33rd Best Engineering Institute – Outlook 2019

AWARDS & RECOGNITION

- ▶ ACI India Hackathon Winner (Oct 2025) — MCP-powered database diagnostics tool, 1st place, 15+ competing teams.
- ▶ 'Pat on Back' award – VOIS, for Sybase OGG project delivery (Dec 2020).
- ▶ 3× 'Best Team Player' award – HSBC Bank, for production crisis management.
- ▶ 'Smart Learner' award – Citi Bank / Wipro Technology.
- ▶ Student Chairman – Prajwalan National Tech Fest 2013; led 650+ members, 9,000+ participants, 35 events, ₹1.2M budget, 30 corporate sponsors.
